Climate Watch Trail

THE WA pilot of a Climate Watch Trail starts at Piney Lakes Reserve in Winthrop.

The Australia-wide Earthwatch initiative involves recording more than 100 different species from plants to birds, reptiles and mammals.

Volunteers have been invited to record their observations online and help scientists to better understand how climate change is affecting the natural environment.

The launch will be on Saturday from 2pm at the reserve, everyone welcome. Afternoon tea is provided and RSVP is essential by calling 9364 0790.

Visit www.climatewatch.org.au for further information on the initiative.
